TITLE	Population Participation Rates by City and County, Fall Term 2000. Virginia Community College System Research Report Series.
INSTITUTION	Virginia State Dept. of Community Colleges, Richmond.
PUB DATE	2000-00-00
NOTE	50p.
PUB TYPE	Numerical/Quantitative Data (110)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*College Attendance; *Community Colleges; *Educational Demand; Enrollment; Enrollment Rate; *Population Distribution; Two Year Colleges
IDENTIFIERS	*Virginia Community College System

ABSTRACT

This document provides numerical data on the rates of population participation in the Virginia Community College System (VCCS) by city and county. Population estimates are based on March 2000 U.S. Census Bureau estimates. Highlights include: (1) the within-region rate for the VCCS is 1.7%, which exceeds the previous year's level and is most comparable to the tabled service region rates for each college; (2) participation continues to be highest for the southwestern region, with Southwest Virginia Community College having the highest rate; (3) using all in-state enrollments, the number of Virginia's population served by the VCCS increased to 1.8%, an increase over the previous year; (4) Virginia's total credit participation rate, 1.9%, substantially exceeds that for two-year colleges in the Southern Regional Education Board (SREB) states (1.8%) and matches the national rate; and (5) rates for combined credit and non-credit participation for fall 1999 are 2.03% (region), 2.22% (state), and 2.35% (total enrollments)--each substantially higher than credit-only rates and exceeding the previous year's participation. Specific information is provided for each of Virginia's 24 community colleges. (JA)

ED 451 873

Virginia Community College System
Research Report Series

Population Participation Rates by City and County
Fall Term 2000

In-region credit participation, 1.70.
Tables that follow include particpation rates for specific cities/counties and college service regions. For these rates, headcount (mid-term) is limited to in-region enrollments. Population for 2000 is based on U. S. Census Bureau estimates for 1999 (March 2000). Participation is headcount as a percentage of the total population. The within-region rate for the VCCS is 1.70, which exceeds last year's level. This rate is most comparable to the tabled service region rates for each college. Participation continues to be highest for the southwestern region, with Southwest Virginia Community College having the highest rate.

In-state credit participation, 1.85.
Using all in-state enrollments, the percentage of Virginia's population served by the VCCS increased to 1.85, also an increase over last fall

Regional and national comparisons, total credit participation, 1.97.
Total enrollments must be used for these comparisons. Using the most recent information available , Virginia's rate, 1.97, substantially exceeds that for two-year colleges in the SREB states, 1.84, and , for the first time, matches the national rate of 1.97.

Combined credit and non-credit participation.
Also included in the tables are separate calculations combining credit and non-credit students. Note that all combined enrollments and rates are for fall 1999. At the VCCS level, the rates are 2.03, 2.22, and 2.35 for within region, within state, and total enrollments, respectively. Each is substantially higher than the credit-only rates, and each exceeds last year's participation.
